邀请函

发现之旅- 辽阳欧洲智能制造产业小镇开园仪式

工业园区是19世纪末工业化国家作为一种规划、管理、促进工业开发的手段，以降低基础设施成本、刺激地区经济发展为目的，虽然在短期内给地区带来各种综合效益，却给人类的生存环境带来巨大且不可逆的威胁。

思颐中国公司管理团队利用公司近百年来在工业工程领域里的经验，深入分析宏观及微观环境在未来对各种产业发展的影响，成功将人才、生产、产品、科技、金融、环境、市场等因素有机整合为一个完整的生态圈，完美诠释并打造了拥有理想的营商环境和完备的基础及生产生活设施的新一代工业园区 - 辽阳欧洲智能制造产业小镇。

小镇规划面积5平方公里，由思颐中国公司全力打造，将是首个实现5G全覆盖以及循环经济（零污染，零排放），具有完善先进的硬件设施，包括智能城市综合管网、城市智能照明指示系统、四通八达的立体交通系统、海绵生态系统的高品质宜居的产业小镇。

思颐中国公司诚挚地邀请您参加此次“发现之旅”，进一步探讨未来产业小镇的发展趋势以及如何为制造业企业创造新机遇。

开幕活动：2019年12月12-13日 中国·辽阳

主办单位：辽阳市人民政府

INVITATION

DISCOVER A NEW GENERATION OF INDUSTRIAL PARKS Grand Opening of S+E Liaoyang Industrial Park

Industrial parks, as a means of planning, management and industrial development promotion had its origin in industrialized countries at the end of the 19th century, aiming to reduce infrastructure costs and stimulate regional economic development. Although they brought comprehensive regional benefits in the short-term, it came at a huge and irreversible detriment to the living environment of human beings.

S+E China seeks to optimize macro and micro environments to better serve the development of different industries in the future. Utilizing the company's decades-old industrial engineering experience, we plan on creating a completed ecosystem of integrated talents, production, products, technology, finance, environment and market factors as a whole – establishing the new generation of industrial parks with a seamless business environment with completed production facilities and living accommodations.

S+E Liaoyang Industrial Park has a total planned area of around 5 km². It was developed under the criteria of smart and effective transport and living arrangements by a German developer and operator, and will be first to have complete 5G coverage and a circular economy (meaning zero waste and zero emissions).

We sincerely invite you to participate in this “**DISCOVER TOUR**” to further explore the development trend of future industrial towns as well as discover new opportunities for manufacturing enterprises.
